Conference Summary

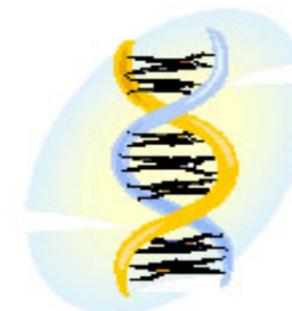

The *Fall 2004 Genetics Conference* is one-day educational conference targeted towards Physicians, Nurses, Allied Health Professionals, Healthcare Providers, Public Health Professionals, and Students in these disciplines. The field of genetics is ever-changing, with new developments and discoveries almost every day. This conference will focus on how to recognize and apply the vast world of genetics to activities in Hawaii, and will provide **practical tools** for today's health care provider for making appropriate referrals to genetic services. The conference is intended to be practical, tangible, and relevant.

We look forward to seeing you at the conference on Sept 10th!

Conference Objectives

With the knowledge, skills, and resources gained through this conference, participants should:

- Have increased appreciation for genetic conditions, and conditions that may have a genetic component, in their practice or caseload;
- Have knowledge and tools to identify and make appropriate referrals for genetic services;
- Be aware of genetics-related projects in Hawaii, and how and when to refer patients to them;
- Be able to identify and contact local genetic resources when genetics questions arise in the future.
